Version history AutoCAD Free Download first came with VBA (very basic automation). The first official release was dated December 1, 1982 and titled AutoCAD Version 1.0. It was written by Autodesk's first employee, Jim Kuiper, and the graphics and GUI designers, Rob Wright and Chuck Junker. Its primary purpose was to produce 2D and 3D graphics of architectural drawings. This product was far from the first CAD program but it was the first to be marketed directly to architects. In May 1982, AutoCAD 1.0 was selected as a winner of the first Mac Computer user interface award from the Mac User Group of the National Capital Area. In December 1982, Autodesk introduced AutoCAD Version 1.0. The first Windows release was AutoCAD Version 1.5, released in 1984. It was written by Jim Kuiper, Rob Wright and Steve Greenberg. AutoCAD 1.5 was the first Windows version to be available as a shareware program. The first non-shareware release of AutoCAD was Version 1.7 in 1986. It was developed by Steve Greenberg, Joe Griffin, Karl Sloat and Jim Kuiper. The new version was completely rewritten in Borland's Pascal. In 1986, Autodesk also purchased GRASS Systems, the developer of Grasshopper, a vector graphic editing tool similar to Adobe Illustrator. The first version of Grasshopper for Windows was AutoCAD Release 2, Version 1.7. In 1987, Autodesk released AutoCAD Release 2, Version 3.0. This was the first version of AutoCAD released without a shareware option. It was a fully-functional, marketable product. AutoCAD 3.0 was available for the Macintosh and Windows platforms. The Macintosh version ran on 8-bit Apple II, IIci, and Macintosh II computers. In May 1988, Autodesk released AutoCAD Release 2, Version 3.5. AutoCAD 3.5 was designed to run on new 32-bit PPC computer hardware. AutoCAD 3.5 was available for the Macintosh and Windows platforms. The first release for OS/2 and Windows NT was AutoCAD 3.5 Extended, which was released in April 1988. This was a major revision of AutoCAD 3.5 that introduced the first 64-bit processors and increased the base memory allocation from 1 Megabyte to

I am looking for the best way to filter answers, but still allowing questions to be answered. Like a google search, where the end results are filtered by users, but the database is still queried, right? A: I'm going to answer the question. I'm afraid that the answer is going to be "no". The idea of a search engine is to provide search results that match your exact query. The idea of a Stack Exchange is that you don't get search results, but instead you get answers to questions with your tags. If a post has the tags you're looking for and matches the rules of the site, it will get an upvote. Thanh Long (disambiguation) Thanh Long is a city in Vietnam.
